

A large, bold, lime green letter 'B' with rounded corners and a thick stroke. It is centered on a dark gray background. The letter is partially overlaid by a white outline of a large, rounded 'B' shape that frames the entire page. There are also some white geometric shapes, like a triangle and a rectangle, scattered around the letter.

# CERNIERE REGOLABILI

La nostra ditta dopo uno studio dettagliato delle problematiche di regolazione delle porte ha deciso di proporre nuove soluzioni.

Siamo lieti di presentarvi due nuove linee di produzione:

- 1 - L'articolo 79 - 79P - 79PRG cerniere regolabili in verticale e orizzontale e reversibili, con un solo tipo di cerniera si può montare una porta sia con l'apertura destra che a sinistra.  
La regolazione verticale è di 5 mm e alza la porta evitando il contatto con il pavimento.  
La regolazione orizzontale è da 1 a 5 mm permette di mettere in asse la porta in parallelo al pavimento.  
Per questa regolazione la cerniera è fornita con un pre-montaggio che si monta nello stipite dove precedentemente viene fatta un'asola di un ingombro di mm 49x20 con una profondità di mm 12.  
La porta può essere smontata in qualsiasi momento senza intervenire sulle viti di fissaggio.

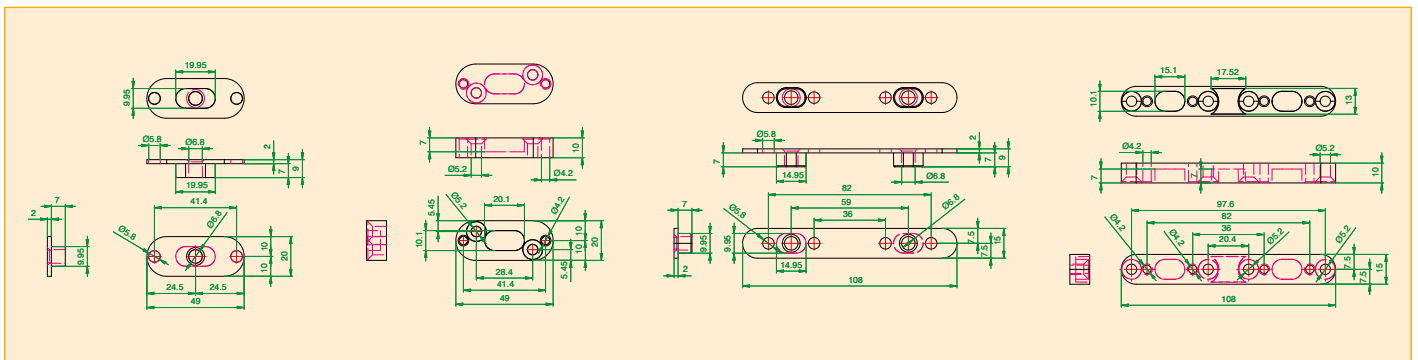

Portata cerniere:

Art. 79 - Kg. 28

- 2 - L'articolo 861 - 861P - 861PRG - 862 - 862P - 862PRG sono cerniere simili a quelle in produzione ma regolabili in verticale e in orizzontale.  
Sono prodotte solamente nelle misure da 120 mm.  
La regolazione verticale è di 5 mm e alza la porta evitando il contatto con il pavimento.  
La regolazione orizzontale è da 1 a 5 mm permette di mettere in asse la porta in parallelo al pavimento.  
Per questa regolazione la cerniera è fornita con un pre-montaggio che si monta nello stipite dove precedentemente viene fatta un'asola di un ingombro di mm 108x15 con una profondità di mm 12.  
La porta può essere smontata in qualsiasi momento senza intervenire sulle viti di fissaggio.

# ADJUSTABLE HINGES

Our company after a carefully studying the problems of door adjustments has decided to propose new solutions.  
We are pleased to introduce two new products lines

- 1 - Article 79 - 79P - 79PRG adjustable hinges vertical and horizontal and reversible.  
With only one type of hinge you can mount a door opening both right and left hand.  
The vertical adjustment is 5 mm and it raises the door avoiding contact with the floor.  
The horizontal adjustment is 4/5 mm, and allows to put the door in axis and parallel to the floor.  
For this adjustment, the hinge is provided with a pre-assembled system that is mounted on the door frame where was previously made a hole of 49x20 mm with a depth of 12 mm.  
The door can be disassembled at any time without affecting the mounting screws.

Load capacity hinge:

Art. 79 - Kg. 28

- 2 - Article 861 - 861PRG - 861P - 862P - 862P - 862PRG hinges are similar to those in production, but adjustable vertically and horizontally.  
They are manufactured only in the 120 mm measure.  
The vertical adjustment is 5 mm and it raises the door avoiding contact with the floor.  
The horizontal adjustment is 4/5 mm. It allows to put the door in axis and parallel to the floor.  
For this adjustment, the hinge is provided with a pre-assembled system that is mounted in the door frame where was previously made a hole of 108x15 mm with a depth of 12 mm.  
The door can be disassembled at any time without affecting the mounting screws.

## REGOLAZIONE CERNIERE

### REGOLAZIONE VERTICALE

Svitare il terminale in alto utilizzando una chiave esagonale da 5 mm per gli articoli 79 - 79P - 79PRG e da 6 mm per gli articoli 861 - 861P - 861 PRG e avvitare la brugola per alzare la porta.

### REGOLAZIONE ORIZZONTALE

Per gli articoli 79 - 79P - 79PRG allentare le viti con un cacciavite, per mettere in asse la porta, regolare con una chiave esagonale da 4 mm la brugola centrale dal foro centrale sull'aletta della cerniera, finita la regolazione bisogna bloccare le viti al pre-montaggio.

Per gli articoli 861 - 861P - 861PRG - 862 - 862P - 862PRG in fase di montaggio, fissare le viti centrali, allentare le viti con un cacciavite, per mettere in asse la porta, regolare con una chiave esagonale da 4 mm le due brugole centrali ai fori sull'aletta della cerniera, finita la regolazione bisogna bloccare le viti al pre-montaggio.

## HINGES ADJUSTING

### VERTICAL ADJUSTMENT

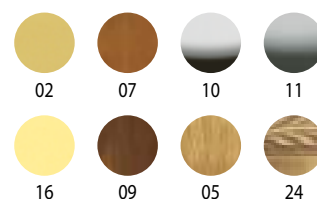

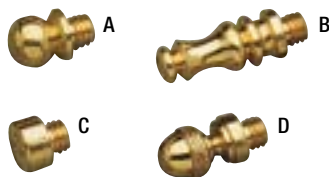

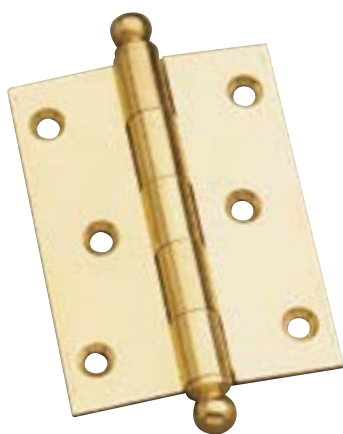

*Unscrew the terminal at the top of the hinge with a 5 m hexagonal key for items 79 - 79 P - 79 PRG and 6 mm for items 861 - 861 P - 861 PRG - 862 - 862 P - 862 PRG and screw the grub screw to raise the door.*

### HORIZONTAL ADJUSTMENT

*For items 79 - 79 P - 79 PRG loose the screws with a screwdriver, to put the door in axis. Adjust with a 4 mm hexagonal key the central grub screw from the center hole on the hinge wing. After the adjustment lock the screws on the pre-assembled system.*

*For items 861 - 861 P - 861 PRG - 862 - 862 P - 862 PRG during the assembling, fix the centrals screws, loose the screws with a screwdriver to put the door in axis, adjust with a 4 mm hexagonal key the two grub screws to the central holes on the hinge wing. After the adjustment lock all the screws on the pre-assembled system.*
